ANTI-SCRATCH

— PREMIUM COLLECTION —

Welcome to **Genoa Sales LLP**, one of the leading brands in India offering a diverse range of **Antiscratch Acrylic Laminates**. With a steadfast commitment to quality and innovation, we bring you an extensive selection of laminates to enhance both the aesthetics and durability of your spaces.

At Genoa Sales, we take pride in our wide range of products, including our flagship **ACRYNOVA** collection of **High Gloss Acrylic Laminates**. This collection showcases a stunning array of finishes, such as **Solid, Metallic, Marble, Veneer**, and Stone, providing endless possibilities to create exquisite interiors that leave a lasting impression.

In addition to our **ACRYNOVA** collection, we also offer the **ACRYSOFT** range of **Matt Acrylic Laminates** in vibrant Solid colors. These laminates combine elegance with practicality, delivering a smooth, matte finish that is both visually appealing and highly resistant to scratches.

Complementing our range of laminates, we proudly introduce:-

D-box Solid Color PVC Laminates: Crafted with precision, these laminates feature a wide spectrum of solid colors that add a touch of sophistication to any surface, whether it be furniture, cabinets, or walls.

Manore PS-Based Wall Paneling: Designed to enhance the aesthetic appeal of your interiors, these panels provide moisture resistance and ease of installation, making them an excellent choice for both residential and commercial spaces.

Devina 6mm Wall Paneling : Launched in August 2024, this innovative wall paneling solution combines lightweight construction with elegant design, making it perfect for modern interiors. Its easy installation and robust durability make it ideal for both residential and commercial applications.

Additionally, we are excited to introduce our latest innovation—**GENASA** premium polymer laminates. Available in both Matt and Glossy finishes, these 1mm thick, full-core laminates come with matching edge bands to ensure seamless design continuity. **GENASA** is engineered to provide superior quality and aesthetic appeal for high-end furniture and interiors, making it the perfect choice for luxury spaces.

At Genoa Sales LLP, we are committed to delivering exceptional products that meet the diverse needs and tastes of our valued customers. Our laminates and paneling solutions are meticulously crafted using advanced manufacturing techniques and high-quality materials to ensure unmatched durability, longevity, and performance.

Experience the **Genoa Sales difference** as you explore our extensive range of Antiscratch Acrylic Laminates, including the **ACRYNOVA** and **ACRYSOFT** collections, **D-box** Solid Color PVC Laminates, **Manore** PS-based wall paneling, the newly launched **Devina 6mm Wall Paneling**, and the high-end **GENASA** premium polymer laminates. Let us be your partner in creating inspiring spaces that reflect your unique style and vision.

Bold shades, lasting shine.
Bring your space to life with acrylic magic.

To avoid the formation of air bubbles when using a laminate sheet to decorate plywood, follow these steps:

1. Prepare the Surface: Ensure that the plywood surface is clean, dry, and free from any dust or debris. Sand down any irregularities or rough spots to create a smooth surface.
2. Measure and Cut the Laminate Sheet: Measure the dimensions of the plywood and cut the laminate sheet slightly larger than the size of the plywood. This extra allowance will allow you to trim the edges later.
3. Apply Adhesive: Use 'GENBond' adhesive. Apply an, even layer of adhesive to the plywood surface using a paint roller or brush, following the manufacturer's instructions.
4. Position the Laminate Sheet: Carefully place the laminate sheet onto the plywood, aligning it properly. Start by positioning one edge and gradually press down the rest of the sheet, smoothing it out as you go. Use a laminate roller or a clean, smooth cloth to remove any air bubbles by pressing firmly from the centre outward.
5. Apply Pressure and Allow Curing Time: After trimming, apply pressure on the laminate sheet using clamps/Abro Tape or heavy objects placed evenly across the surface. Maintain this pressure for at least 48 hours to allow the adhesive to fully cure and create a strong bond between the laminate and the plywood.
6. Trim the Edges: Once the laminate sheet is in place and free from air bubbles, allow the adhesive to dry according to the manufacturer's instructions. Then, use a laminate trimmer or a sharp utility knife to carefully trim the excess laminate from the edges of the plywood, following the shape of the plywood.
7. Apply Edge Banding (Optional): If desired, apply edge banding to cover the exposed edges of the plywood. Use a laminate trimmer or a sharp utility knife to cut the edge banding to size and adhere it using an appropriate adhesive.

By following these steps, using the recommended 'GENBond' adhesive, applying pressure, and allowing for sufficient curing time, you can minimize air bubble formation and achieve a smooth, professional-looking laminate finish on your plywood.

Please note: Genoa Acrylic laminates do not take any responsibility for air bubble formation during the application process. Formation of Air Bubbles is strictly an application issue and beyond the scope of manufacturing faults.

DO & DON'T'S

1. Store the laminate in a cool and dry place.
2. Do not use Fast acting glue like HEATX on acrylic laminates as they can cause color changes.
3. Do not use hard reactive cleaners like alcohol, solvent, acetone, petrol, pinewood, or oil. These will damage the surface of the acrylic.
4. please use a soft microfiber cloth for cleaning.
5. Do not place HOT items near the surface of the Acrylic. As the sheet is flammable and can easily melt. Acrylic laminates are not Fire-resistant.

DO NOT KEEP ACRYLIC IN ROLL FORM AT THE SITE. CRACKS WILL EMERGE WHEN ACRYLIC LAMINATES ARE KEPT IN ROLL FORM FOR OVER 24 HOURS. PLEASE CHECK THE SHEETS RIGHT AFTER RECEIVING AND OPEN THE ROLL. GENOA DOES NOT ACCEPT RETURNS FOR CRACKING OF ACRYLIC LAMINATES AFTER 24 HOURS OF DELIVERY

There can be colour variation in material from different batches. It is advised to use same batch material to avoid colour variations. Actual colour of the Acrylic sheet may vary from this brochure.
